

The methods of learning for the visual

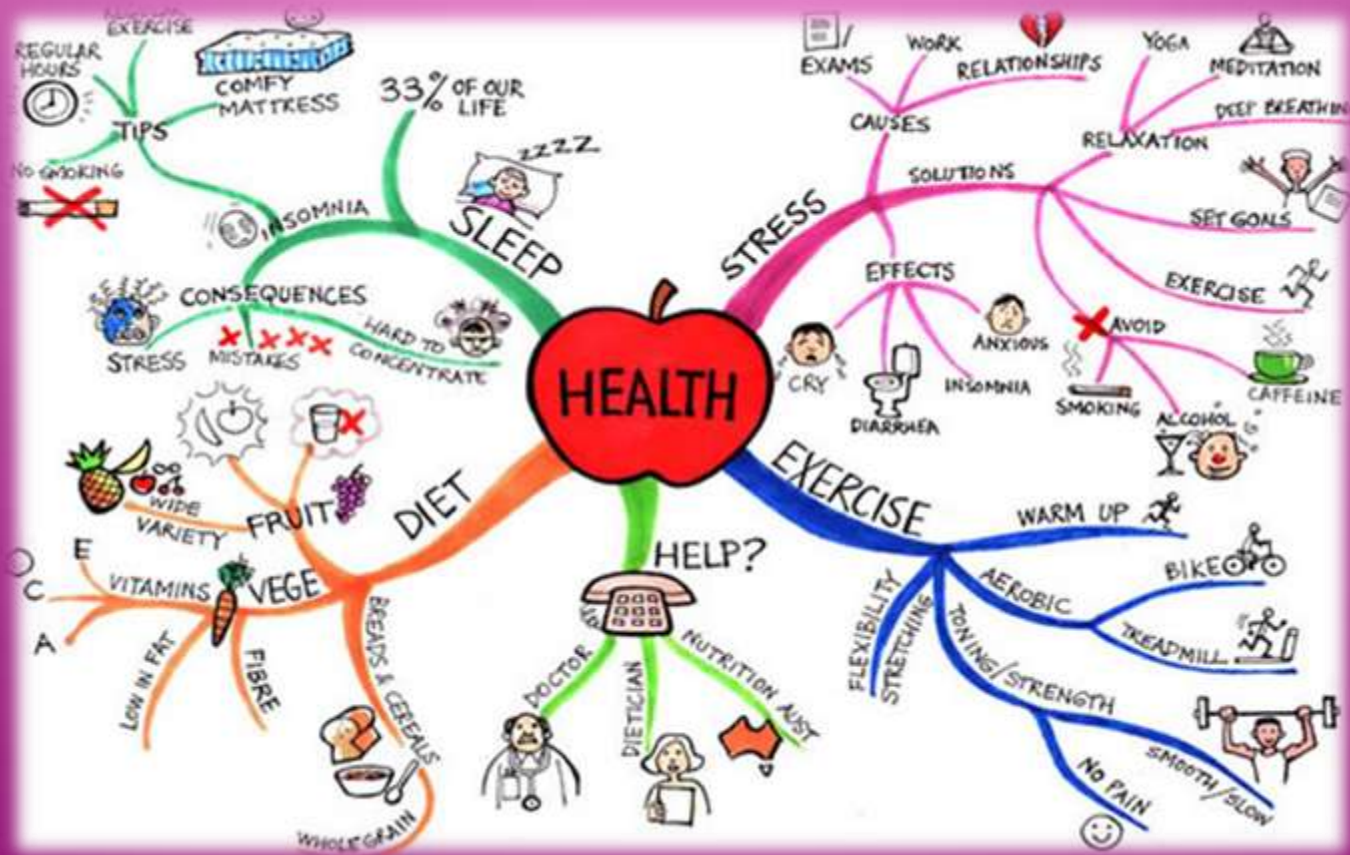

Make a drawing

Students very often do drawings. If they must learn something, it's good to make a draw on paper and use colorful pencils! It's really useful!

Create a mindmap

Write on your mindmap only the most important words who can help you. Use many colours and shapes.

The tidy desk

When students have mess on their desk, they can have problems with concentrations and can't study very well.

The power of the colours!

Students who are visual need see everything in many colours. They like using highlighters, colour pens and colorful sticky notes. It helps remember everything!

Underlining the important news in books

For visualizers, one with methods is underling the important news in book, because while preparing for an exam it is easier to learn the important news.

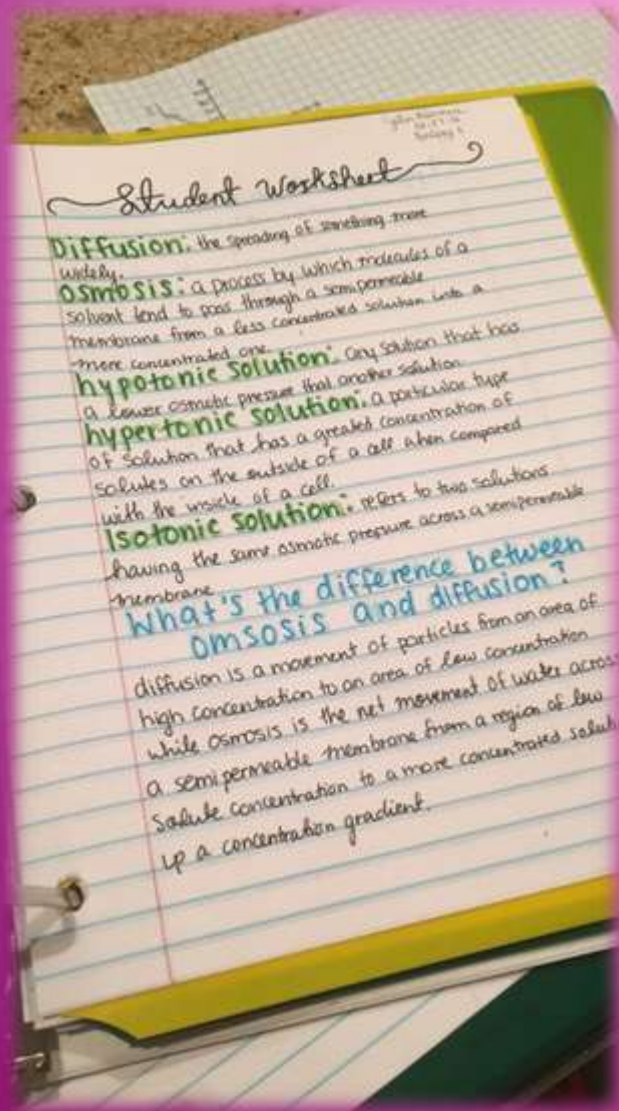

Colour slips of paper stuck in various places

Next with methods is sticking
Colour Slips of papers
with the important news
Into various places of
the house.

In this way seeing them
we are reminding
ourselves informations.

Pretty letter

Students more easily are studying
Writing alone notes-nicely and exactly

THE END
